

RAIN. WIND. GLASSES.

Sound familiar?

ICL vision correction at LAAC

Viesturs Reinis / Chief Commercial Officer, Latvian American Eye Center
CanCham Show & Tell / 28 September 2026

ICL

**A small lens.
A different daily
routine.**

Implantable Collamer Lens
Inside the eye. No corneal tissue removal.

Less dependence on glasses and contact lenses

Why ICL?

- See with clearer vision within 20-30 minutes
- Reversible
- Invisible
- Does not change the structure of the eye
- Corrects **short-sightedness** and **astigmatism** from -**3.00** to -**20.00** dioptres
- Typically for patients from **21-45 years old**
- See with clear vision within 20-30 minutes
- Does not cause *dry eye syndrome*

ICL IS YOUR FIRST CHOICE FOR VISION CORRECTION

**Over 4 million lenses have been implanted
worldwide.**

Thin cornea? High prescription?
Start with an individual suitability assessment.

*Unsuitable for laser does not automatically mean suitable for ICL.

A person is riding a black mountain bike on a dirt trail in a forest. The rider is wearing a black t-shirt, olive green shorts, black gloves, black knee pads, and black socks with 'DEEENT+' written on them. The bike has 'MAXXIS' tires and a water bottle is attached to the frame. The background shows several tree trunks and a forest floor covered in leaves.

LIFE OUTSIDE.

For everyone.
An active everyday life.

LET'S OPEN A NEW DOOR.

ICL care in Riga for everyone.

We're looking for employers, medical contacts
and referral partners.
