

PROLUX

PROFESIONĀLĀ TEHNIKA

SIA PROLUX

your professional
partner from
idea to service

Professional equipment · technology solutions · technical service

25+

years in professional
equipment

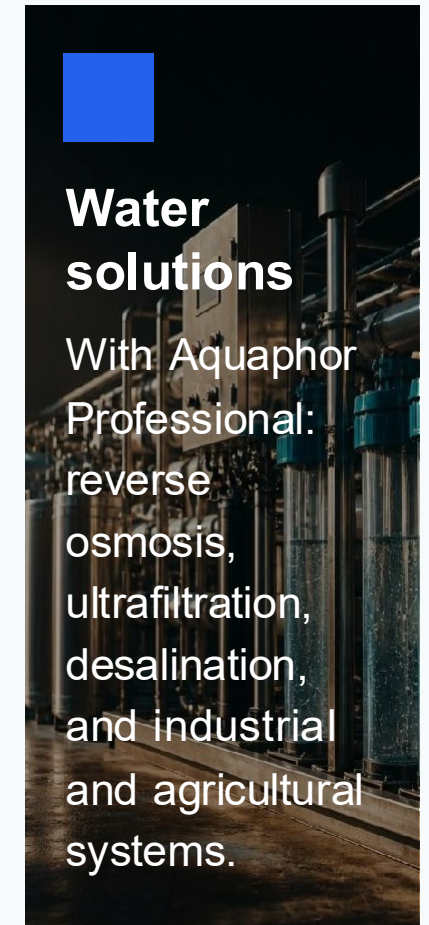

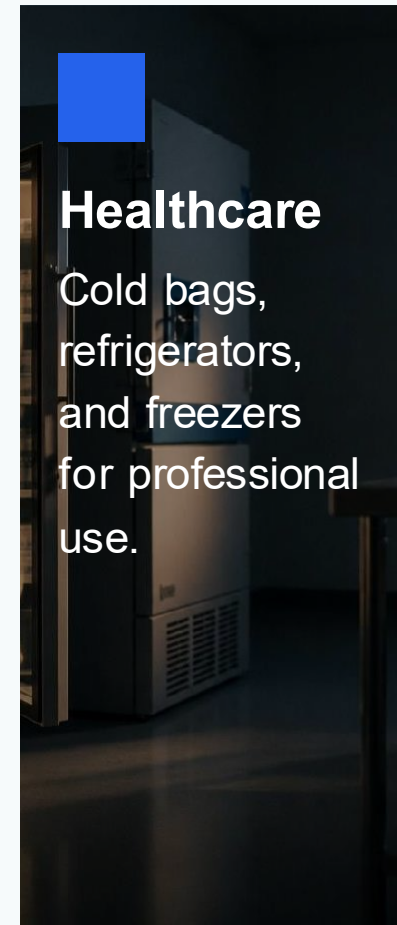

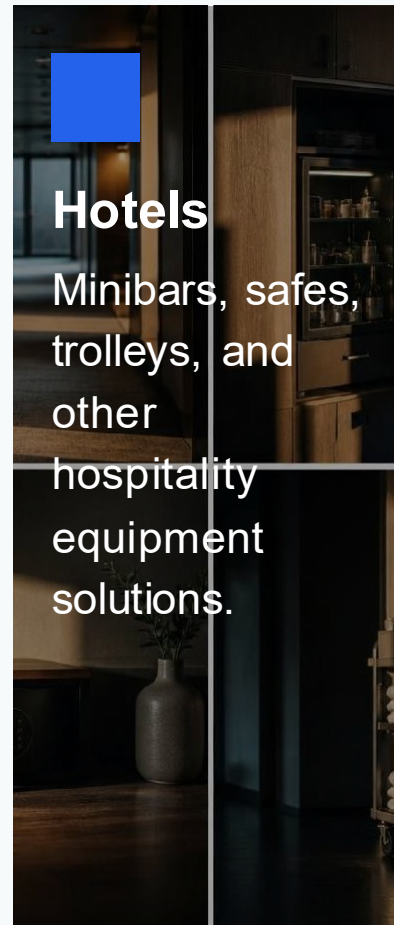

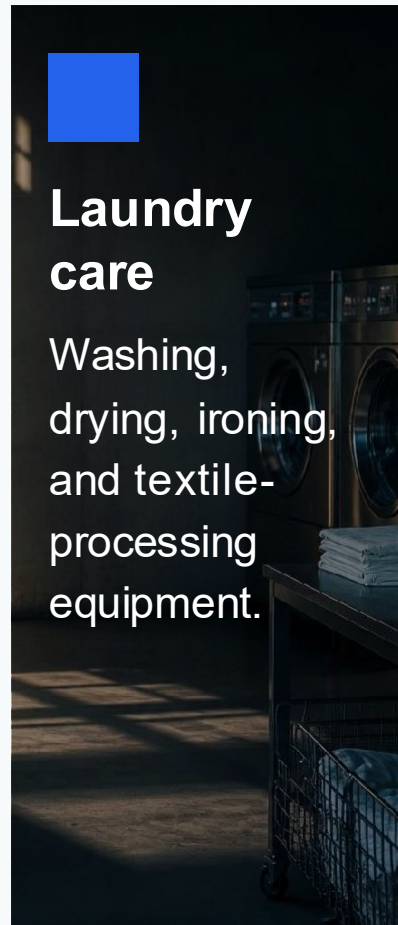

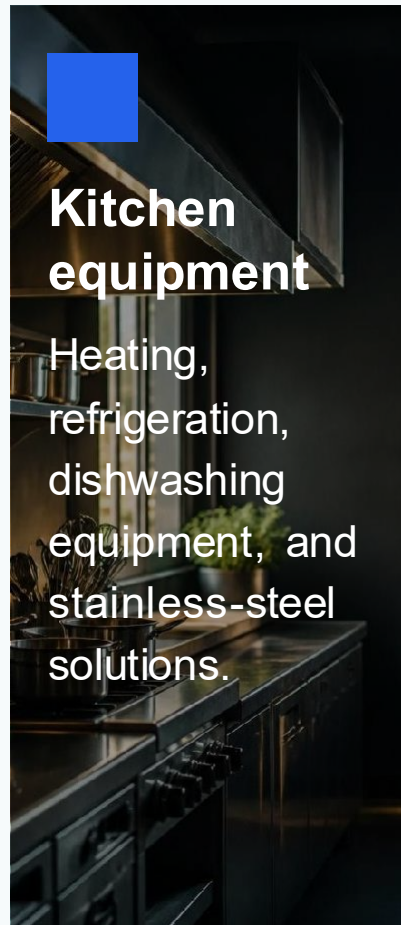

Experience that connects equipment, technology, and service.

Historical distribution roots

PROLUX was founded in 1999, taking over the distribution of Electrolux professional equipment in Latvia. Our work is grounded in integrity, efficiency, and quality.

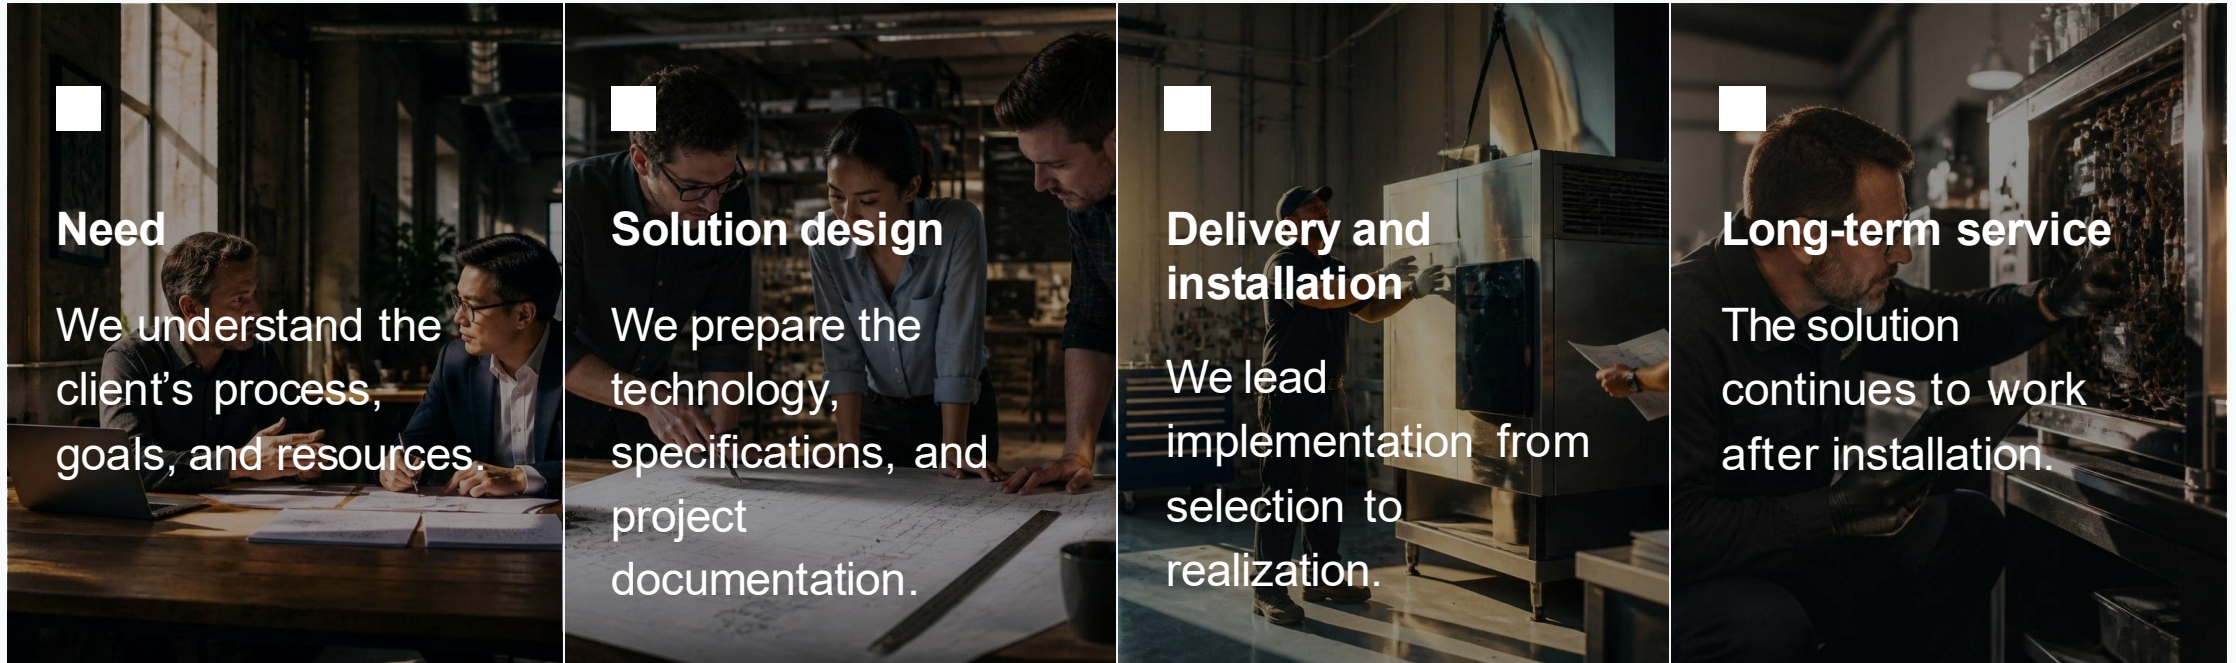

Five solution areas, one competent team

Different professional environments, one approach: understand the need and match it with a solution that works in practice.

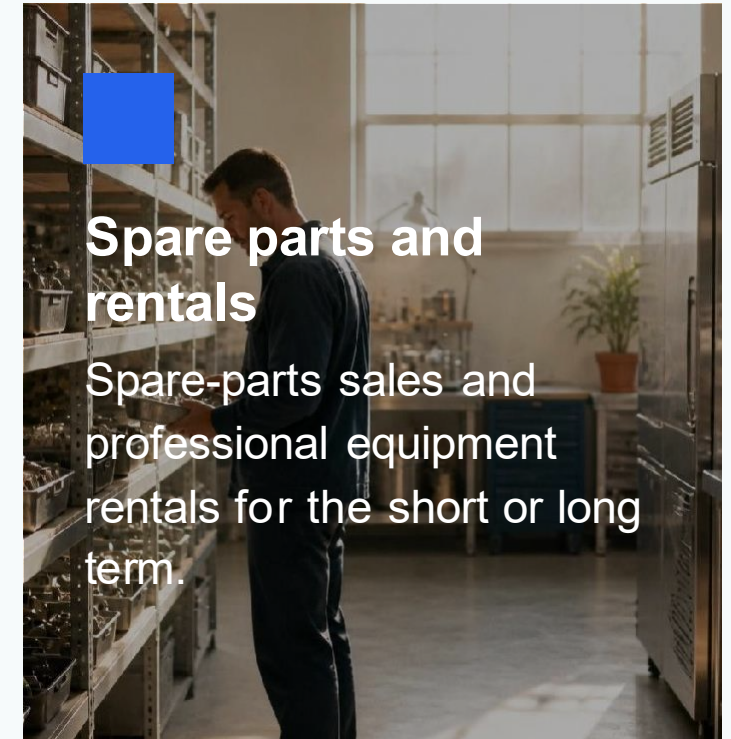

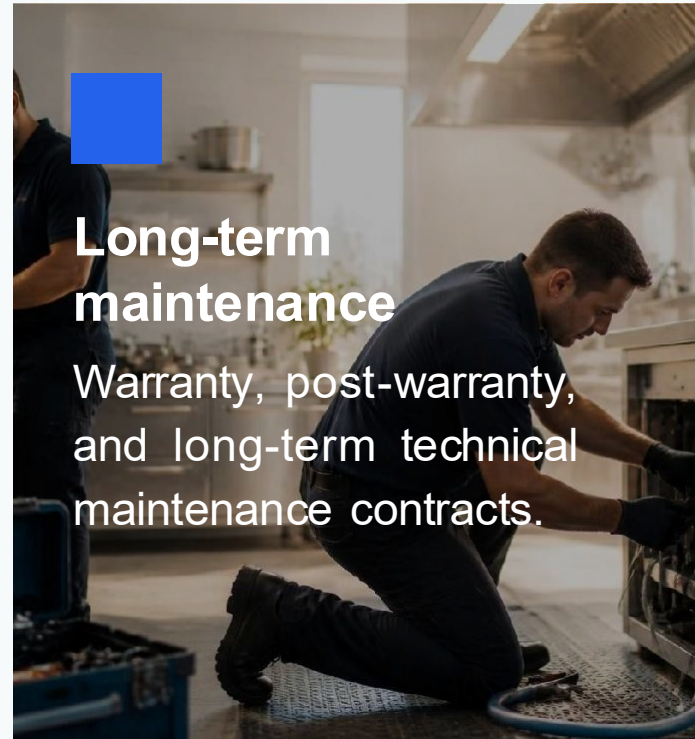

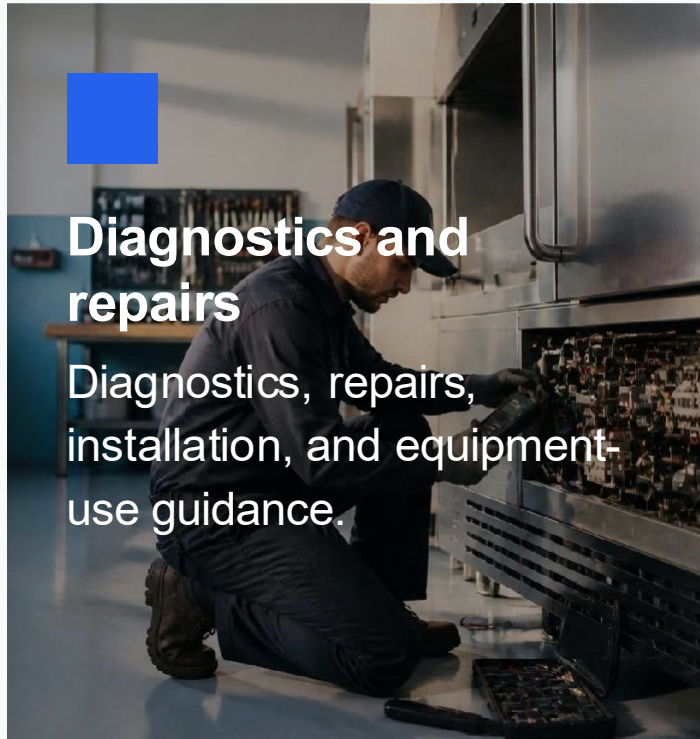

A solution starts with understanding the client's business

From the initial need to a ready-to-use system — with a clear process and documentation.

Service that continues after installation

Service expertise reduces downtime risk and helps equipment retain its value in the working process.
